

Brewing Perfection: Large-Scale Transport Mastered

Task & Details: Complex Challenge: Heavy-Lift, Oversized Cargo

When a prominent Nicaraguan brewery needed to expand operations, they turned to NMT Projects. Our mission? Transport and install massive fermentation tanks from Germany with pinpoint precision – a feat we conquered through comprehensive oversight and unmatched expertise.

Client Background

Compañía Cervecera de Nicaragua, a leading brewery, required six massive fermentation tanks to be moved from Germany to their facility in Managua for a critical expansion project.

The Challenge

Ensuring the safe transcontinental transportation and precise installation of the oversized, heavy tanks presented significant complexities. The tanks needed to be shipped from Germany to Rotterdam, then to Nicaragua, before being lifted into place at the brewery using specialized heavy equipment.

Our Unstoppable Execution

NMT Projects took full control, managing every aspect of this intricate operation with our trademark meticulous oversight. We coordinated the tanks' collection in Germany, shipping to Rotterdam, ocean freight to Nicaragua, and final delivery to the brewery site.

Then came the pièce de résistance – utilizing a powerful 500-ton crawler crane, our experts executed the lifting and installation with pinpoint accuracy, positioning each tank perfectly on its foundation.

The Results

From origin to final installation, this project showcased NMT Projects' ability to deliver comprehensive, turnkey logistics solutions for even the most complex heavy-lift challenges. Our end-to-end oversight ensured the brewery expansion stayed on track and operational.

“Despite the complexities of transporting massive tanks from Germany to Nicaragua via Rotterdam, NMT Projects not only handled the logistics but also overcame challenges during installation.” – NMT Projects
